

WATER SERVICE LINE INVENTORY

Attention Minerva Residents

Minerva is partnering with the non-profit organization RCAP to help inventory water service lines in accordance to new EPA rules and mapping mandates.

RCAP Staff, will be going door-to-door to help complete in-home water service line inspections.

We will ask to check the pipes in your basement or crawlspace to confirm your line doesn't contain lead.

We will report the pipe material back to your village water department in order to help them comply with USEPA mandates.

If you are more comfortable doing your own scratch test, please complete this survey form.
